

Bellara Steel

Lymsa manufactures part of the Algerian steel complex

Specification

Description

Lymsa awards the manufacture of a project placed in the creation of Bellara Steel's new metallurgical complex.

The manufacture of this complex, placed in Bellara's industrial park, to the north-east of Algeria, is a plan that takes in march from the ends of 2015 managed by the company Algerian Qatar Steel (AQS), a consortium of Algerian brands with Qatar Mining International.

Lymsa takes part in the production and manufacture of different phases of these projects with a sum of one million and a half tons of structural steel made up to the first quarter of 2017, with forecast of extending this quantity in the next months.
