

A new industrial building for Sancal

In Yecla, Murcia, Spain

Description

The sofas manufacturer brand **Sancal** expands its facilities with a new industrial warehouse annexed to the existing one in Yecla, Murcia.

This is the timelapse video of its construction:

This new production building has an area of more than 4,500 m² built between a main warehouse -divided into a 2,300 m² basement and a ground floor, with almost 1,500 m²- and an offices building with more than 740 m² in two different floors.

This new industrial building follows the aesthetic line of the existing factory and it's completely linked to it. The building consists of more than 340,000 kilos of steel at the structure, enclosures with prefabricated concrete panels of 16 cm, and sandwich panel covering with 6 cm PIR insulation system.

This expansion reaffirms the strong development of **Sancal**, one of the most important and undoubtedly original sofa designer and manufacturer brand in Spain.
